THE TZ MEDICAL STORY

When TZ Medical founder, Tom Tribou, sat planning his new company in a Portland coffee shop in 1990, he made two bedrock decisions. The first was that TZ Medical would turn the paradigm of medical equipment manufacturing on its head by taking the time to listen to medical professionals on the front lines, and find out what they needed, before huddling with its own engineers. The second decision was that pricing should be at the value level, to ensure that these bright ideas would make their way into the hands of critical-care medical professionals faster.

Over the years these ideas have served the company well. What was once a small collection of critical-care devices has grown into a whole family of medical products, sparked by your ideas. With products sold across the nation and all over the world, TZ Medical has built a solid reputation for itself on the first two decisions laid out in the company’s infancy.

Today, the TZ Medical team is recognized as a group that creates products based on input from professionals in some of the finest medical facilities throughout the world. These innovative health professionals have often helped supply the missing piece of a puzzle, revealed the essence of a problem, or posed the perfect “what if” question in order to help solve a dilemma, and facilitate practical solutions.

Between our dedication to listening, and our firm belief in affordable pricing, it’s no wonder that TZ Medical has been, and will continue to be, a lasting leader in the medical device manufacturing world.

OUR MISSION STATEMENT

Our mission is to design, manufacture, and deliver products that meet and exceed the needs and expectations of each customer. We will sustain our vision and mission by constantly seeking renewal via continuous education and learning, and the application of new technologies and best business practices. We will do business as model individual and corporate citizens in our local and international communities. We will “play to win”, acting with absolute honesty, integrity, and fairness in the way we conduct our business and the way we live our lives.
At TZ Medical, we take pride in our practice of partnering with physicians, nurses, and technologists to help bring new product ideas to market. With decades of practical experience in design, manufacturing, and engineering, we excel in transforming your innovative ideas into product realities. Our most reliable and valuable asset to improving healthcare is YOU.

COMFORT ZONE

The Comfort Zone line of products are designed to enhance both physician and patient comfort during long procedures, as well as protecting staff from radiation.

StandTall™ • Comfort Cradle • Comfort Cloud
RadStop Station • Total Access Radial Board
Secure Radial Board • Cobra Board • Comfort Shield
Comfort Halo • Patient Immobilizer • IR/Cath Lab
Table Pad • SR Headband • Flipper • Radial Runway
Shoot ‘N See • Pannus Retention System
StandTall™ drastically improves both patient and physician positioning for left radial artery procedures performed from the right side of the procedure table. StandTall™ enables the physician to work left radial access cases comfortably, without having to hunch or stoop over, and avoids the hassle of having to revert to femoral access and the various increased risks that going femoral entails.

**StandTall™**
Dimensions: 10 cm
Item# RD-ST0010L
Dimensions: 15 cm
Item# RD-ST0015L
Dimensions: 25 cm
Item# RD-ST0025L

---

**Physician benefits**
- Decreased fatigue and musculoskeletal stress
- Improved site access and stability
- Streamlined workflow
- Allows for a more ergonomic posture for the physician from the right side of the table

**Patient benefits**
- Greater comfort with left arm positioning
- Quicker recovery and reperfusion times
- Enables convenient access to non-dominant hand (90% of patients are right handed)
- Improved overall procedure satisfaction

**Hospital benefits**
- Reduced cost vs. femoral approach
- Reduced post-op patient management
- Fewer physician work-related absences due to MSK stress or injury

---

Without StandTall™

With StandTall™

Allows for a more ergonomic posture for the physician from the right side of the table.
COMFORT CRADLE

The Comfort Cradle aids both the patient and operator during procedures involving fluoroscopy. The extended width of the board helps make long procedures more tolerable to the patient, and allow the physician’s hands to remain unobstructed during the procedure. The result is superior image quality and reduced radiation exposure for the staff.

The new White Comfort Cradles are made from an extremely durable Polypropylene material that can withstand large amounts of force.

**Comfort Cradle**
*Dimensions: 21”x 12”x 9”*
*Item# CZ-100 (set of 2)*
*Item# CZ-001 (1 each)*

**White Comfort Cradle**
*Dimensions: 21”x 12”x 9”*
*Item# CZ-100-PP (set of 2)*
*Item# CZ-001-PP (1 each)*

COMFORT CLOUD

The Comfort Cloud helps make long procedures more tolerable to the patient by cushioning the arm, helping improve procedure satisfaction all around.

**Comfort Cloud**
*Box of 20*
*Item# CZ-002*

RADSTOP STATION

The RadStop Station is a lightweight polycarbonate board designed to hold the Comfort Shield to help protect operators and staff from radiation produced during imaging procedures. The shape and construction of the board is designed to be easily moved under the patient into nearly any configuration to extend radiation protection in ways that fixed position devices can’t achieve. The RadStop Station can help speed up these procedures as well as prevent contamination of equipment.

**RadStop Station**
*Item# CZ-010*
The Secure Radial Board is designed to secure and orientate the patient's right or left arm during any vascular procedures. The arm board and straps eliminate unwanted movement, yielding a consistent image for the physician when performing vascular access. The Secure Radial Board is invisible under fluoroscopy, and can be used on right or left side radial access.

Secure Radial Board
Dimensions: 44.4” x 22.9”
Item# CZ-400-TVA

Disposable Straps
Dimensions: Two 2” x 24” straps,
One 2” x 18” strap
Item# TVA-MC-2

TOTAL ACCESS RADIAL BOARD

The Total Access Radial Board is a lightweight carbon fiber board specifically shaped to allow convenient radial access in conjunction with medical imaging and patient comfort. The Total Access Radial Board can be used for either right or left side radial access, and also provides a large work area that can double as a landing zone for instruments and devices.

Total Access Radial Board
Dimensions: 44.4” x 22.9”
Item# CZ-400

SECURE RADIAL BOARD

The Cobra Board is a buttress device that can prevent arm drift during left radial artery procedures. This device accommodates a wide range of anatomies due to the flexible 12” gooseneck design. The gooseneck is also high tensile to prevent the instrumented arm from drifting away from the operator during catheterization procedures. The carbon fiber base plate fits between the procedural table and mattress, and the cuff is positioned behind the patient's tricep, for optimal patient comfort and enhanced operating ergonomics.

Cobra Board
Item# CBR-0004
**COMFORT SHIELD**

The Comfort Shield is a leaded drape designed to slip over the Comfort Cradle or RadStop Station, and attenuates up to 97.9% of the scatter radiation associated with fluoroscopy.* The shield’s flexible and durable vinyl construction is easily sterilized and the shield can be hung up for convenient storage.

The Comfort Shield attenuates the radiation at its highest concentration point, greatly reducing instances of long-term health issues for the physicians and staff who routinely perform procedures where x-ray is essential.

*Based on study held at TZ Medical

*Comfort Shield  
Item# CZ-105

---

**COMFORT HALO**

The Comfort Halo is a flexible anesthesia screen holder designed to keep the drape off of the patient’s face. The steel and vinyl tubing can be molded into any shape, offering unlimited draping positions, and the sleek and sturdy polycarbonate base is compatible with all bed types.

*Comfort Halo  
Dimensions: 23” x 14.5”  
Item# CZ-009
The IR/Cath Lab Table Pad is the perfect pad for the Cardiac Cath lab or the Interventional Radiology lab, allowing for both patient comfort and optimal positioning for patient access. Available in 130” and 72”, with custom sizing available to fit all CCL/IR lab tables. The facial cutout and adjustable wedge placement allow for both prone and supine positioning options.

IR/Cath Lab Table Pad
130” - Item# CZ-130
72” - Item# CZ-072
Custom Length - Item# CZ-IRPAD

Complete customization is available to meet lab needs and wants. Call 800.944.0187 to order a custom IR/Cath Lab Table Pad.

The Patient Immobilizer allows the patient to be safely secured during procedures that use conscious sedation, including: Pacemaker implants, cardiac catheterizations, cardioversions, interventional radiology/CVOR procedures, and imaging procedures. The patient’s wrists can be safely attached to the leg wrap by using the quick snap and rapid adjustment webbing.

Patient Immobilizer Body Wrap
Item# CZ-106
Patient Immobilizer GE Style Bed
Item# CZ-107
Patient Immobilizer Wrist Wraps
Box of 10
Item# CZ-008
Patient Immobilizer XXL Extender
Item# CZ-012
The SR Headband is a cost effective way to block scatter radiation from reaching one of the most sensitive areas of the body during diagnostic and interventional procedures. The band is disposable, lead free, easily worn, adjustable to any head size, and attenuates 87% of radiation at 80 kVp.*

SR Headband
Box of 10
Item# CZ-013

The Flipper is a radiation shield designed to maintain physician safety without interfering with procedures. The Flipper measures 19” by 16”, and may be used on either the right or left side, for femoral groin access, or subclavian access. Adhesive strips allow it to be secured in place to avoid slipping. Lead free and attenuating up to 75% of radiation at 90 kVp, the Flipper is ideal for Interventional Radiology, Cardiac Cath Labs, Electrophysiology and more.

Flipper
Box of 15
Item# CZ-007

*Based on study held at TZ Medical
**SHOOT ‘N SEE**

The Shoot ‘N See is a flexible medical-grade tape for use during any vascular procedure involving radiography or fluoroscopy. Applied to the skin or drape before the procedure, the radiopaque markings are visible both to the eye and under fluoroscopy, which allows for quick cross-referencing between the inside and outside of a patient’s body.

Shoot ‘N See - available in 3 quantities
- Item# RCM-0005-10 (Box of 10)
- Item# RCM-0005-30 (Box of 30)
- Item# RCM-0005-50 (Box of 50)

---

**RADIAL RUNWAY**

The Radial Runway provides a radiolucent platform that keeps the patient in normal anatomical position for ideal radial access. Disposable straps allow the wrist to be positioned in multiple neutral or extended angles optimizing patient comfort. Post procedure, the foam pad may be removed from the base and attached to the disposable brace, providing support for the patient’s wrist during recovery.

Radial Runway
Reusable Base
Item# RRU-0008
Disposable top pads, straps, and brace
Box of 10
Item# RRU-0009
PANNUS RETENTION SYSTEM

CZ-PRS-04

The Pannus Retention System PRS-04 is a hook & loop pad and strap system designed to safely and effectively move and retain excess tissue. The adhesive backing and adjustable straps preserve tissue integrity, while supporting, retaining, and moving large masses of tissue. The PRS-04 is sterile, designed for surgical applications, and ideal for high BMI C-sections in Labor & Delivery Departments.

PRS-04
Box of 10
Item# CZ-PRS-04 (4 pads and 2 straps, sterile)

Product Dimensions: 4 - 5.5" X 7.5" Pads  2 - 48" Straps

THE PRS-04 IS IDEAL FOR USE DURING THE FOLLOWING PROCEDURES:

- Trans Aortic Valve Replacement (TAVR)
- High-BMI Cesarean Sections
- Extreme Lateral Interbody Fusion (XLIF)
- Posterior Cervical Spines
- Anterior Cervical Spines
- Port Placements
- Cervical Lymph Node Biopsy
- Hemorrhoid Procedures
- Thyroids
- Parathyroids

*Patient signed consent form and gave TZ Medical permission to use photo*
PANNUS RETENTION SYSTEM

CZ-PRS-02
The Pannus Retention System PRS-02 is a hook & loop pad and strap system designed to safely and effectively move and retain excess tissue. The adhesive backing and adjustable straps preserve tissue integrity, while supporting, retaining, and moving large masses of tissue. The PRS-02 is designed to position patients undergoing a variety of procedures including femoral access, radial access, pacer/ICD implants, etc.

PRS-02
Box of 10
Item# CZ-PRS-02 (2 pads and 1 strap)

Product Dimensions: 2 - 5.5” X 7.5” Pads  1 - 96” Strap

THE PRS-02 IS IDEAL FOR USE DURING THE FOLLOWING PROCEDURES:

- Femoral Artery Access
- Left Arm Radials
- Pacemaker Incisions
- Breast Deflection for Pacer/ICD Implants
HEMOSTASIS

TZ Medical’s line of hemostasis products offers a variety of configurations to accommodate multiple patients and procedure types. Our high quality, cost-effective hemostasis products either contain, or can be used in conjunction with, Neptune, a calcium alginate pad that greatly speeds up clotting time. Our hemostasis products provide our customers and their patients with time-tested efficiency and unparalleled safety.

ARC ● Neptune ● Neptune Plus ● E-Neptune SilverStat ● Comfort Band ● Neptune Comfort Band EZ Hold ● Discs
The Adjustable Radial Cuff (ARC) is a premium radial hemostasis controlled compression device designed to accurately apply focused pressure to the radial artery access site. The ARC’s structured cuff design and targeted inflation system provides consistent and focused hemostasis, maintains patency of the radial artery (patent hemostasis), while protecting the ulnar artery integrity.

ARC Adjustable Radial Cuff

**NEPTUNE PAD**

The Neptune Pad is a natural product derived from seaweed to help facilitate hemostasis. The calcium alginate, taken from sustainably harvested seaweed, provides the calcium ions necessary for the hemostasis process. These ions are activated by the introduction of blood to the Neptune pad, and help to naturally speed up clot formation at the puncture site.

*Neptune Hemostasis Pad  
Box of 10  
Item# 8870-01*

**NEPTUNE PLUS**

The same great hemostasis results from our original Neptune Pad are also achieved with Neptune Plus, with the additional benefits of a protective polymer backing. The calcium alginate provides the calcium ions necessary for the hemostasis process, and help to naturally speed up clot formation at the puncture site. The Neptune Plus backing is translucent, allowing for better visualization of hemostasis.

*Neptune Plus  
Box of 10  
Item# 8870-03*

**E-NEPTUNE**

The E-Neptune Pad is a natural product derived from seaweed to help facilitate hemostasis. The calcium alginate, taken from sustainably harvested seaweed, provides the calcium ions necessary for the hemostasis process. These ions are activated by the introduction of blood to the E-Neptune pad, and help to naturally speed up clot formation at the puncture site.

*E-Neptune  
Box of 10  
Item# 8870-04*

**SILVERSTAT**

The SilverStat pad is an all-natural calcium alginate pad infused with silver nitrate; these compounds combine to make a safe and highly effective dressing.

*SilverStat  
Box of 10  
Item# 8870-07*
COMFORT BANDS
Comfort Bands offer a soft plastic radial pressure band with ridges on the exterior for fine-tuned adjustments and maximum patient comfort. These bands are available in both sterile and non-sterile varieties and are also offered in three color coded sizes to accommodate all patient types.

Sterile Comfort Bands
Box of 10
Item# CB-8514B (14 inch Sterile)
Item# CB-8517P (17 inch Sterile)

Non-Sterile Comfort Bands
Box of 12
Item# CB-7514B (14 inch Non-Sterile)
Item# CB-7517P (17 inch Non-Sterile)
Item# CB-7520G (20 inch Non-Sterile)

NEPTUNE COMFORT BANDS
The Neptune Comfort Bands offer a hands-free approach to hemostasis following needle or sheath removal. They can be used in cardiac cath labs, radiology departments, and dialysis clinics for radial, brachial, and hemo-dialysis procedures. They are sterile, and have a built-in Neptune hemostasis pad to facilitate hemostasis at the puncture site.

Sterile Neptune Comfort Band
Box of 10
Item# CB-8514N (14 inch)
Item# CB-8517N (17 inch)
The EZ Hold is a manual-assist compression device developed to aide the clinician in manual femoral pressure. The EZ Hold was designed and patented by an RN who sought to reduce hand fatigue and direct contact with bodily fluids. The ergonomic design of the EZ Hold permits the clinician to hold pressure comfortably with one hand while palpating the pulse with the other.

**EZ Hold**

DEFIBRILLATION ELECTRODES

Our multi-function electrodes are designed for EP and cath labs, cardiac surgery, critical-care areas and other related departments to treat patients for defibrillation, synchronized cardioversion, external pacing and ECG monitoring. Compatible with biphasic and monophasic defibrillators, our electrodes offer direct connections to a variety of defibrillators, thereby eliminating the hassle of using adapters.

Multifunction Adult Electrodes
Pediatric Electrodes • Sterile Electrodes
DEFRILLATION PADS

Our defibrillation pads are constructed to adhere and conform to the patient’s body, providing superior current distribution, which results in better clinical outcomes. Our direct-connect electrodes are comparable to Zoll®, Medtronic® QUIK-COMBO™ and Philips® electrodes. We also offer adapters and cables allowing multiple brands of defibrillators to use the same electrodes or to standardize a facility to one connection type.

### ADULT ELECTRODES

- **Radiotranslucent Electrode, leads out**

- **B** = 6.0” x 9.0”
- **C** = 4.25” x 2.876”
TRANSPARENCY COMPARISONS

Our defibrillation pads offer superior invisibility under fluoroscopy, making them ideal for imaging procedures. Not only is our pad nearly invisible under fluoroscopy, the lead wires are also greatly diminished in appearance. These images show a range of competitor’s defibrillation pads compared with TZ’s defibrillation pads.

LEAD WIRE COMPARISONS

TZ MEDICAL ELECTRODES: 60"

COMPETITOR’S ELECTRODES: 42"

COMPETITOR’S ELECTRODES: 24"
STERILE DEFIBRILLATION PADS

Our sterile defibrillation pads are constructed to adhere and conform to the patient’s body, providing superior current distribution, which results in better clinical outcomes. Our adapters for Zoll, Medtronic, and Philips defibrillators allow multiple brands of defibrillators to use the same electrodes.

Sterile Radiotranslucent Electrode
Box of 10

Item# P-122-T1

STERILE ZOLL CONNECTOR PADS

TZ Medical offers direct-connect Zoll compatible sterile defibrillation pads. These pads feature superior current distribution as well as extra long lead wires, and are available in adult and pediatric sizes.

Sterile Zoll Defibrillation Pads
Box of 10
Item# P-121-Z1 (Adult)
Item# P-224-Z1 (Large back pad)
Item# P-122-Z1 (Pediatric)

Z1 Connector  M1 Connector  P2 Connector  T1 Connector

Z1 - Zoll Models are comparable to Zoll® multifunction electrodes.
M1 - Medtronic models are comparable to Medtronic® Physio Control QUIK-COMBO™ electrodes.
P2 - Philips models are comparable to Philips® gray flat-style electrodes.
T1 - Universal refers to the original TZ Medical concept of adapters, allowing multiple brand of defibrillators to use the same electrodes.
ELECTROPHYSIOLOGY

Catheter ● Booker Box
EZ Holder ● TruBrite
CATHETER

The dual-site 7F catheter provides the electrophysiologist with multiple options for the treatment of atrial and ventricular tachyarrhythmias. It allows the physician to position the distal end of the catheter into the coronary sinus (CS) while allowing the proximal electrodes to map the high right atrium (HRA). Subclavian access eliminates the need for an additional femoral stick. The 14 platinum electrode spacing helps facilitate assessment of a line of conduction block.

Catheter
Item# CF-D7-AAA-NSDA

BOOKER BOX

The Booker Box is a multi-port connector with switching capabilities for connection to defibrillators, EP study equipment and RF electrosurgical generators. The box provides a stable focal location for multiple wires, cables and connections.

Booker Box
Item# V1-MPC

EZ HOLDER

The EZ Holder is a versatile device that acts as an anchor point to firmly hold catheters and lead wires in place during procedures. This innovative product will help reduce procedure time as well as improve the efficiency of EP cases and implants.

EZ Holder
Box of 10
Item# CT-0010

TRUBRITE

TruBrite is a disposable LED light source that provides extra illumination during procedures involving deep incision pockets, such as pacemaker and device implants. The TruBrite is packaged sterile and is designed to adhere directly to an Army-Navy Retractor. The LED light is flexible and can be adjusted up or down to provide optimal visibility within the procedure pocket. Each TruBrite is ready to use in seconds, and will provide peak power for a minimum of 2 hours.

TruBrite
Box of 10
Item# ARL-1010
SOFTGELS

SoftGels provide superior cushioning and positioning, ensuring optimal exposure to the surgical site. The gels reduce skin changes and pressure-induced soreness, and allow for easy exposure to a surgical site, providing optimal physiological safety for the patient.

The Workplace Safety Products line is designed to increase safety for both patients and staff during procedures. These products also cut down on fatigue during long procedures or while transferring patients of all sizes.

Slide Tube ● Wire Caddy
Anti-Fatigue Mats
SLIDE TUBE

The Slide Tube is a textile-based device used to transfer and reposition patients with multi-use and disposable options. The proprietary fabric, minimizes friction, which reduces risk and improves patient care and caregiver safety. The Slide Tube increases efficiency, while reducing costs associated with lateral patient transfer.

Multi-Use Slide Tube
Box of 50
Item# TZ-MU-58X40

Single Use Slide Tube
Box of 50
Item# TZ-ST-58X40

WIRE CADDY

The Wire Caddy is designed to address unique challenges in complex surgical procedures, especially those involving multi-wire and multi-exchange cases. Its unobtrusive positioning allows quick access to lubricated guidewires during surgical procedures in Interventional Radiology, Catheterization Laboratory, Vascular Suite and Operating Room operations. The Wire Caddy is particularly useful for single operators, IR Trainees, Fellows and Residents.

Wire Caddy
Box of 5
Item# WIRE-CADDY
ANTI-FATIGUE MATS

The Anti-fatigue Mats provide unmatched ergonomic construction reduces discomfort & fatigue caused by standing. The Eco-Pro Medical Anti-Fatigue Mat is an ergonomic study winner constructed with ¾” thick polyurethane foam for unmatched ergonomic comfort and support for nurses and technicians who stand in for long periods of time. The mats are fluid & dirt resistant with anti-microbial properties. The matte textured surface provides optimum traction.

Available in six standard sizes

- 20” x 32”
- 24” x 36”
- 20” x 48”
- 20” x 72”
- 36” x 60”
- 36” x 114”

For a full list of Anti-Fatigue Mats part numbers please call us at 800-944-0187
The TZ Medical Pro11 Headset is a wireless headset system designed for clinical staff communications. As healthcare technology and procedures evolve, the use of wireless headsets by clinical teams is becoming commonplace.
**Increases Staff Communication**
The TZ Medical Pro11 Headset System enables teams to talk hands free in the OR and adjacent rooms - no raised voices nor straining to hear, just clear, calm communication between every member of the team, reducing stress and creating a better working environment. The system has full connectivity with external broadcast and audio visual streaming facilities, enabling the physician to participate real-time in remote broadcasts and seminars. Using high quality DECT frequencies, multiple systems can be used in the same premises without interference.

**More Effective**
Clear discrete audio communication between physicians and clinical staff in interventional cardiovascular and other minimally invasive therapeutics results in safer, more effective workflows and treatment.

**Secure Frequencies**
Operating on high quality DECT frequencies, the system is encrypted to avoid interference from other devices or powerful emissions in the OR. Multiple systems can be used in the same premises without break-through.

Pro11 Headset System comprises a wall-mounted base station, up to 30 headsets and 6-port headset charger/storage racks.

### Headset Part Numbers
- TZ-Q-P11BS: Pro11 Base Station
- TZ-Q-P11CH: Pro11 Charger
- TZ-Q-P11HS: Pro11 Headset c/w Battery and Headband

### Headset Accessories
- TZ-Q-P11BAT: Battery for Headset
- TZ-Q-P11HB: Headband for Headset
- TZ-Q-RH7HC: Hygiene Covers (pack of 100)
- TZ-Q-RH7EC: Ear Cushions (10 pack) for Headset
- TZ-Q-P10SHELF: Battery Charger Shelf
C-View Platform
CARROT MEDICAL
C-View Platform
The C-View video display platform is a user-friendly interface designed to replace existing multi-bank display systems with a single large display solution. The UHD 4K display monitor seamlessly integrates with your current equipment, allowing for customizable layout presets from a single intuitive touchscreen tablet. The C-View platform accommodates all of your visual needs by streamlining procedural workflow, simplifying case management, and more importantly, enhancing patient care.

C-View Lite System
- 55-inch 4K display
- 8 modality inputs
- Protective anti-glare glass
- Ancillary box to support mobile devices
- Intuitive touchscreen tablet interface
- Customizable layout presets
- Includes backup displays for live x-ray and live ECG
- 12-month warranty

C-View Pro System
All the features of the Lite, Plus…
- Larger 58-inch 4K display
- 18 modality inputs
- Redundant power supply for main display
- 4K reference display

C-View Platinum System
All the features of Pro, Plus…
- 26 modality inputs
- KVM switch to manage several modalities in the control room
- (2) 4K reference displays
- 18-month warranty
Staff who are routinely performing imaging procedures are at an increased risk for radiation exposure and aren’t always as protected as they could be, which can lead to serious health problems. Our Radiation Protection line offers a variety of products that protect lab staff from harmful scatter radiation.

Radiation Protection Gloves
Mobile Barriers • Spider Rack • Terminator
Radiation Protection Eyewear
SECURE TOUCH RADIATION PROTECTION GLOVES

Protect your hands from scatter radiation without losing dexterity. The Secure Touch XR series gloves are powder free, offer high tensile strength, and have textured fingers and palms for maximum tactile sensitivity. They are offered in two thicknesses, and offer attenuation as high as 64% at 60 kVp. Available in sizes from 6½ to 9. Sold in boxes of 5 pairs.

For a full list of Radiation Protection Gloves part numbers, please call our office at 800-944-0187

MOBILE BARRIERS

Mobile barriers are made with Barrier Safe™ Radiation Protection Glass - a laminated safety radiation shielding lead glass with 1.6mm Pb equivalent at 150 kVp - to provide maximum protection. The shatter-resistant glass will not discolor. The mobile barriers are delivered fully assembled.

Total Dimensions: 75” x 34” x 24”
Window Dimensions: 24” x 30”

Mobile Barrier 24” x 30”
Item# MB-2430
Mobile Barrier 48” x 30”
Item# MB-4830
**SPIDER RACK**

The Spider Rack is a portable, stable apron rack. The eight hangers swing forward and backwards. It features a 24” wheel base, and is available with a top mounted glove rack. The Spider Rack is ideal for OR and Cath Labs.

*Spider Rack*
*Item# SP-RACK*

---

**TERMINATOR**

A mobile, fully encapsulating device that is virtually weightless. It is body contoured, height adjustable, and covered in Ultraflex™ anti-bacterial stain resistant fabric. It has 1.0mm lead equivalent protection, with 100% attenuation at 160 kVp.

*Terminator XR Special Apron Vest*
*Item# TXR-SA*

*Terminator Adjustable Mobile Barrier*
*Item# TERMINATOR-XR*

*Terminator XR Sterile Disposable Drape*
*Box of 20*
*Item# TSD-100*
Radiation Protection Eyewear

**Barrier Lite**
These polycarbonate wrap around frames weigh 60 grams, and are available with side shields. They have a lead equivalence of 0.75 mm Pb. Available in Crimson, Black, and Silver.

**Atomic**
These wrap-around glasses weigh just 60 grams, and have a lead equivalent of 0.75 mm Pb. The rubberized, anti-slip frames are antimicrobial, and feature vents to prevent fogging. Available in Black, and Gunmetal Grey.

**Astro II**
The frames feature adjustable frame angle and temple length. Available with side shields for additional protection. The frames weigh 90 grams, and have a lead equivalence of 0.75 mm Pb. Available in Blue and Pink.

**Oakley Crosslink**
These sleek frames are constructed of light weight, durable O-Matter™ material, with Unobtainium™ nosepads and ear socks for enhanced grip. The frames weigh just 58 grams, and have a lead equivalence of 0.75 mm Pb. Available in Satin Black and Grey Smoke.

**Nike Brazen**
This lightweight and stylish design has a universally fitting frame for all face sizes, with a ventilated nose bridge for additional support. The frames weigh 76 grams, with a lead equivalence of 0.75mmPb. Available in Black and Tortoise.

**Nike Rabid**
These lightweight frames are designed to fit medium to large faces, with secure wrap temple arms for stability and comfort. The frames weigh 64 grams, and have a lead equivalence of 0.75 mm Pb. Available in Black and Grey-Anthracite.

CARDIAC MONITORS

The TZ Medical line of cardiac monitoring devices combine wireless communication with easy-to-use monitors that help record and send important cardiac data in real time, helping physicians diagnose and treat their patients quickly and accurately.

Trident™ Holter Monitor
Trident™ Pro 4-in-1 Monitor
Trident™ Holter Patch Monitor
TRIDENT™ HOLTER

The Trident™ Digital Holter Recorder is an accurate, reliable and user-friendly cardiac monitoring device. It is capable of storing up to 3 channels of patient ECG data acquired from 3 or 4 surface electrodes adhered to the body for up to 30 days of continuous recording. Its diminutive and stylish design is discreet and comfortable to wear.

TRIDENT™ HOLTER FEATURES

- Record up to 30 days of EKG data
- Large LCD color touchscreen with an on-board digital diary
- Rechargeable Lithium Battery lasts up to 14 days from single charge
- Compact and discrete device with water resistant case

Two great options to suit your monitoring needs

PURCHASE MODEL

TURNKEY SOLUTIONS FOR IN-HOUSE HOLTER MONITORING

System includes software, recorders and all necessary accessories for holter monitoring services

TZ Medical preferred warranty included

Most cost competitive holter monitoring system on the market today!

SERVICE MODEL

REDUCE REPORT TURNAROUND TIME

HIPAA compliant web portal to upload study data via USB connection

Reports delivered within 24 hours

IMPROVE STAFF EFFICIENCY

Outsource holter reports and significantly reduce total staffing time per study

Intuitive navigation

SIMPLIFY YOUR HOLTER SYSTEM

Zero capital investment with no term commitments

Low, flat fee for up to 48 hour study (extended study capability available)
4-in-1 Monitor
The Trident™ Pro is an all-in-one device designed for use in Holter, Extended Holter, Event Monitoring, and Mobile Cardiac Telemetry. Three channels of ECG data are acquired from surface electrodes adhered to the body for up to 30 days of continuous monitoring, and common arrhythmias are captured via the onboard detection algorithm.

The Trident™ Pro also features an internal lithium battery that may be charged while in use, along with an onboard diary where symptomatic events and current activity levels may be entered directly into the LCD color touch screen display.

Records up to 30 days of continuous EKG data
Large LCD color touchscreen with an on-board digital diary
Lithium battery may be charged while in use
Compact and discrete device with water resistant case

Fewer Components. Simpler Operation. Smarter Monitoring.
Holter Patch Monitor
The Trident™ Holter Patch is an accurate, reliable, and user-friendly Patch monitor designed to provide clear and comprehensive ECG results during Holter and Extended Holter studies. It is capable of recording 3 channels of patient ECG data using a single 3-lead electrode patch. The Trident™ Holter Patch is discreet, comfortable to wear, water-resistant, and fully rechargeable for study durations lasting up to 30 days. Once the study is complete, monitoring data is uploaded via USB connection, and the device can be restored to default settings for the next patient.

*For study durations lasting up to 30 days, multiple patch electrodes are needed.

- Records 3 channels of ECG from a single patch electrode
- Fast and simple data retrieval via USB connection
- Fully reusable and rechargeable device
- 3-color LED light indicator for device notifications
- Water-resistant for showering

Call 800.944.0187 for part numbers and more information on our Trident™ Line
INNOVATION MEETS SIMPLICITY

The Trident™ line of cardiac monitors are designed from the ground up to simplify and streamline the hookup process. Connect the device to USB, enter patient and study information into the ClearBeat web portal, then attach the device to the patient. It’s that simple. When the device is returned, simply reconnect the USB to backup stored data and restore the device to default settings for future enrollments.
ClearBeat Monitoring Service

Fast & Reliable Arrhythmia Detection

Our team of CCT and CRAT certified technicians provide 24/7 ECG analysis of Holter, Extended Holter, Event, and MCT studies along with industry leading turnaround of urgent event and end of service summary reports.

How It Works

1. Perform patient hookups and returns right at your own facility.
2. Upload the data from the monitors to our online portal from any workstation with internet access.
3. Receive finished reports to review, interpret, and sign using any device with internet access.

To begin a new study, launch ClearBeat and connect the device to USB. Enter patient demographics and prescribed study settings. The device will be automatically configured then begin to upload acquired ECG data once connected to the patient. Once returned, reconnect to USB to automatically backup stored data and reset the device for a new enrollment.

- Simplified enrollments
- One-step device configuration & reset
- Industry leading report turnaround times
- Review & e-sign reports from any web-connected device or facility EMR system
- Seamless transition from Holter to Event or MCT
