# RADIOTRANSSPARENT ECG ELECTRODES

TZ Medical’s new Radiotransparent ECG Electrodes are high-quality snap electrodes designed to deliver reliable cardiac monitoring without interfering with imaging. Engineered to be completely transparent under fluoroscopy, these electrodes help ensure clear, unobstructed visualization during procedures, enhancing both accuracy and efficiency in the clinical environment. Each electrode provides secure adhesion and consistent signal performance, making them ideal for use in cath labs and other imaging-intensive settings.

**Completely transparent under  
fluoroscopy and imaging!**

Item #	Description	UOM
RLE-1001	Radiotransparent ECG Electrodes	Packs of 50
