

The TZ Medical Bayonet Knife is a 145 mm bayonet-style surgical knife used to precisely remove small fragments and pieces of tissue during spine or neurosurgery procedures. The stainless steel blade is extremely sharp and enables precision cutting with minimal distribution of peripheral tissue, while the ergonomic plastic handle is designed to fit comfortably in the operator's hand.

## Features

- 145 mm length provides optimal visibility and maneuverability in the cutting area
- Ergonomic handle for enhanced comfort
- Extremely sharp and strong to enable precise cuts
- Designed for spine/neuro and minimally invasive surgery
- High-quality and cost-effective
