

CONTROL THROMBECTOMY FILTER & TUBING SET

The Control Thrombectomy Filter and Tubing Set is a universal system that is compatible with multiple mechanical thrombectomy devices and provides instant visualization of extracted thrombus without having to leave the sterile field. The transparent housing of the filter is designed with anti-fog material to allow for clear and immediate observation of collected thrombus.

Features

- Provides instant and clear visualization of extracted thrombus on the sterile field
- Filter and Tubing set is compatible with multiple thrombectomy systems, such as Penumbra™ and Medtronic™
- Fog-resistant chamber traps thrombus for easy visualization

OBSERVE EXTRACTED THROMBUS

WITHOUT LEAVING THE STERILE FIELD
