

2 (2" x 4") Pads

1 (1" x 4") Pad

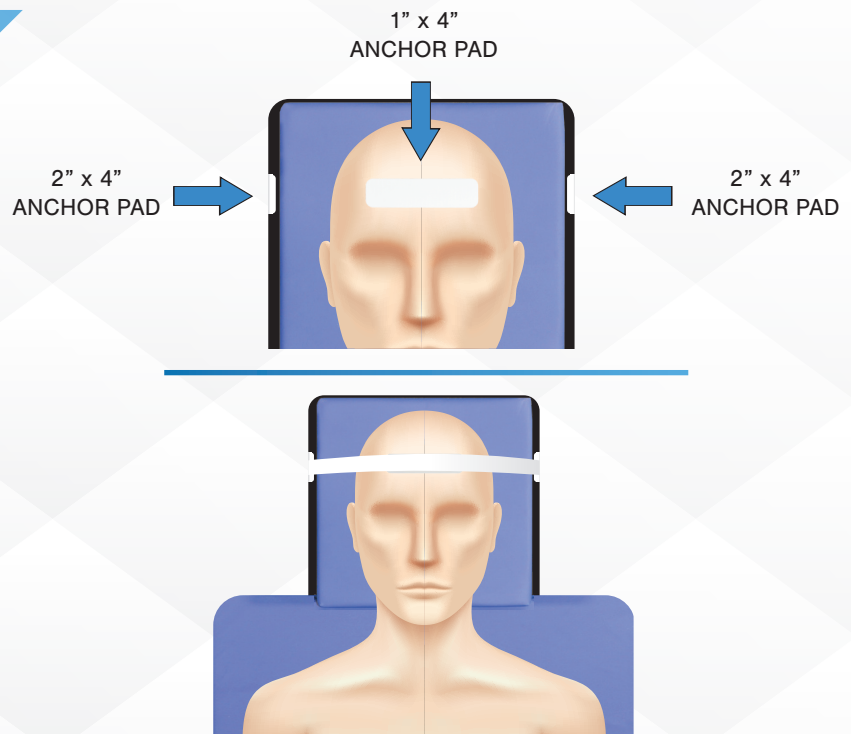

1 (1" x 48") Strap

The Cranial Immobilization System (PRS-03) is a safe and effective solution for immobilizing the patient's head during imaging and various surgical procedures. Designed with a micro hook and loop technology, this unique system is completely adjustable to ensure optimal support and comfort for your patients.

## Features

- Immobilize the patient's head in a safe and effective manner
- Hypo-allergenic, latex-free and residue-free
- Completely adjustable system - easy to apply and reposition if needed
- Prolong equipment life-span and increase regulatory compliance by avoiding tape and tape residue
- Can be used in various procedures such as Cataract Surgery, Neurointerventional Radiology, MRI/CT scans, and more!
