Panni XL Panniculus Retractor Clears Infection

How Panni XL improves healing times and patient comfort.

Situation

- Fit, active-duty military mom on her fifth c-section (abundant scar tissue).
- Yeast infection that had been treated with antifungals for four days with no improvement.

Friday at 12 PM

Solution

Our medical device representative asked if we could trial the Panni XL to increase airflow to the incision site and keep the area dry and exposed. The Panni XL was applied on a Friday at noon and removed the following Monday at 9am.

Monday at 9 AM
