# PEDIATRIC DEFIB PADS

TZ Medical's Pediatric Defibrillation Electrodes boast the same clinical benefits as our adult pads, however, are designed for your adolescent patients. Our Pediatric Defibrillation Electrodes are constructed to adhere and conform to the patient's body, providing superior current distribution, which results in better clinical outcomes.

Our multi-function electrodes are designed for EP and Cath Labs, Cardiac Surgery, Critical-Care Areas and other related departments. They are designed for defibrillation, synchronized cardioversion, external pacing and ECG monitoring. Compatible with biphasic and monophasic defibrillators, our electrodes offer direct connections to a variety of defibrillators, such as Zoll® and Medtronic® QUIK-COMBO™. We also offer adapters, allowing multiple brands of defibrillators to use the same electrodes.

## Features

- 60" lead wires for maximum convenience and utility
- Hydrogel maintains excellent adhesion to the patient's skin
- Unique edge effect technology disperses energy uniformly, reducing burns
- Radiotransparent and radiotranslucent options available

### Radiotransparency
