Pullie™
Surgical Pannus Retractor
by *StetriX*

A Simpler Approach to Pannus Retention

Simplified. Integrated. Ready for the Field.

The TZ Medical Pullie is designed to safely and effectively position and support excess tissue during procedures requiring abdominal access, including cesarean sections.

The Pullie features pre-attached straps integrated directly into large adhesive pads, simplifying setup and enabling efficient sterilization before or after device application.

Applied in under one minute, the Pullie maintains patient comfort while allowing flexible positioning from multiple angles without the complexity of separate components.

PN: PULLIE-04

Key Features

- Pre-attached strap-and-pad system allows for quick and easy prepping over the pads adhered to the patient.
- Large adhesive pads for secure placement
- Fully adjustable for a wide range of patient sizes
- Easy repositioning after application
- Sterile and procedure-ready
- Latex and residue-free adhesive that is gentle on skin

See how simple pannus retention can be.
