THE TZ MEDICAL STORY

When TZ Medical founder, Tom Tribou, sat planning his new company in a Portland coffee shop in 1990, he made two bedrock decisions. The first was that TZ Medical would turn the paradigm of medical equipment manufacturing on its head by taking the time to listen to medical professionals on the front lines, and find out what they needed, before huddling with its own engineers. The second decision was that pricing should be at the value level, to ensure that these bright ideas would make their way into the hands of critical-care medical professionals faster.

Over the years these ideas have served the company well. What was once a small collection of critical-care devices has grown into a whole family of medical products, sparked by your ideas. With products sold across the nation and all over the world, TZ Medical has built a solid reputation for itself on the first two decisions laid out in the company's infancy.

Today, the TZ Medical team is recognized as a group that creates products based on input from professionals in some of the finest medical facilities throughout the world. These innovative health professionals have often helped supply the missing piece of a puzzle, revealed the essence of a problem, or posed the perfect "what if" question in order to help solve a dilemma, and facilitate practical solutions.

Between our dedication to listening, and our firm belief in affordable pricing, it's no wonder that TZ Medical has been, and will continue to be, a lasting leader in the medical device manufacturing world.

OUR MISSION STATEMENT

Our mission is to design, manufacture, and deliver products that meet and exceed the needs and expectations of each customer. We will sustain our vision and mission by constantly seeking renewal via continuous education and learning, and the application of new technologies and best business practices. We will do business as model individuals and corporate citizens in our local and international communities. We will "play to win", acting with absolute honesty, integrity, and fairness in the way we conduct our business and the way we live our lives.

RADIAL ACCESS PRODUCTS

ROC BAND

RADIAL COMPRESSION DEVICE

The TZ Medical ROC Band is a mechanical radial compression device designed to preserve the patency of the radial artery during hemostasis. The device utilizes an adjustable screw cap connected to a mechanical screw thread to control the amount of pressure over the puncture site and the radial artery without using a syringe.

- Mechanical screw cap enables fine-tuning of pressure
- Completely transparent for optimal visualization
- Designed to preserve the patency of the radial artery
- Large silicone pad delivers uniform pressure over the puncture site and radial artery
- No syringe required

Item Number	Description	UOM
ROC-1	ROC Radial Compression Band - Regular Size	Box of 10
ROC-2	ROC Radial Compression Band - Large Size	Box of 10

RADIAL RUNWAY

RADIAL ACCESS WRIST POSITIONER

The Radial Runway provides a radiolucent platform that keeps the patient's wrist in a deflected position for ideal radial access. Disposable straps allow the wrist to be positioned in multiple neutral or extended angles, optimizing patient comfort and physician preference. The foam pad and straps remain with the patient post-procedure, acting as an immobilizer for the patient's wrist during recovery.

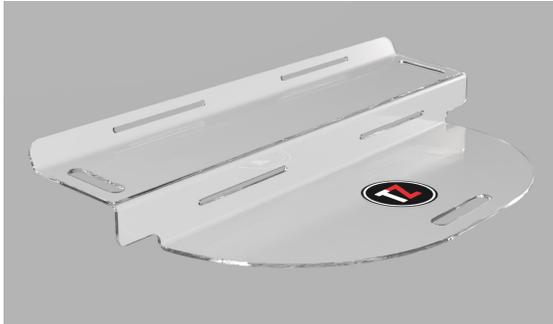

- Can be used for radial access on either wrist
- Wrists may be positioned at multiple angles
- Disposable straps, foam pad & brace
- Base can be sterilized & reused
- Adjustable straps fit any size patient
- Pad with brace remains with the patient for recovery

Item Number	Description	UOM
RRU-0008	Radial Runway - Reusable Base	1 Each
RRU-0009	Disposable Top Pad, Straps, and Brace	Box of 10

RADIAL ACCESS PRODUCTS

LEVELUP RADIAL BOARD

ARM ELEVATING RADIAL BOARD

The LevelUp Radial Board is designed to elevate the patient's arm so it aligns perfectly with the top of the table mattress, ensuring optimal positioning and comfort during radial catheterization procedures. Its low-profile design easily slides under the table mattress for quick setup and stability. The LevelUp Radial Board can be used on either the left or right side of the table, making it an essential accessory for any cath lab.

- Extremely durable polycarbonate construction
- Easy to slide and reposition under the table mattress
- Can be used on the right or left side of the table for radial arterial procedures
- Improves patient comfort by keeping the arm level with the table mattress
- Improves physician posture when accessing the radial sheath, reducing stress and fatigue

Item Number	Description	UOM
LVL-0001	LevelUp Radial Board	1 Each

TOTAL ACCESS RADIAL BOARD

LARGE CARBON FIBER RADIAL BOARD

The Total Access Radial Board is a lightweight carbon fiber board specifically shaped for convenient radial access in conjunction with medical imaging and to increase patient comfort. It has a large landing zone for equipment and can be used for right- or left-side access.

- Can be used on either the right or left side for radial access
- Large landing area for equipment
- Lightweight carbon fiber construction
- Invisible under fluoroscopy
- Can be used for all diagnostic & interventional imaging procedures

Item Number	Description	UOM
CZ-400	Total Access Radial Board	1 Each

SECURE RADIAL BOARD

CARBON FIBER RADIAL BOARD WITH STRAPS

The TZ Medical Secure Radial Board is specifically designed to secure and position the patient's right or left arm during vascular procedures. The arm board and straps prevent unwanted movement, ensuring a stable and consistent image for the physician when performing vascular access.

- Can be used on either the right or left side for radial access
- Straps reduce patient movement
- Large landing area for equipment
- Lightweight carbon fiber construction
- Invisible under fluoroscopy
- Can be used for all diagnostic & interventional imaging procedures

Item Number	Description	UOM
CZ-400-TVA	Secure Radial Board	1 Each
TVA-MC-2	Disposable Straps - One 18" Strap, Two 24" Straps	Each (3 Straps)

COBRA BOARD

LEFT RADIAL ARM POSITIONER

The Cobra Board is a buttress device that can prevent arm drift during left radial artery procedures. Its flexible 12-inch gooseneck design accommodates a wide range of anatomical variations. Made from high-tensile material, the gooseneck ensures that the instrumented arm remains stable and does not drift away from the operator during catheterization procedures. The carbon fiber base plate fits securely between the procedural table and the mattress, while the cuff is positioned behind the patient's tricep to provide optimal comfort and enhance ergonomic conditions for the operator.

- High tensile 12" gooseneck can be adjusted to desired position
- Carbon fiber base plate
- Prevents left arm movement during procedures
- Detachable cuffs are disposable post-procedure & are available in two sizes
- Cuffs are designed with soft ergonomic padding to enhance patient comfort

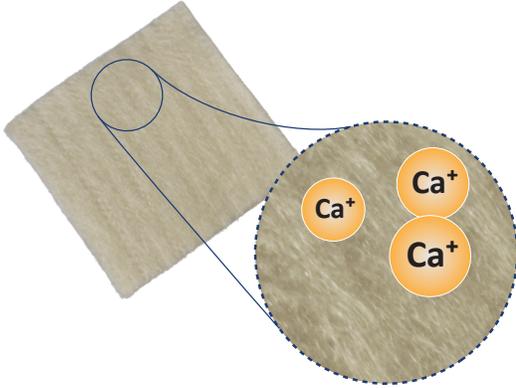

Item Number	Description	UOM
CBR-0045-S	Cobra Board Kit - Cobra Board, Box of Small Cuffs, Box of Large Cuffs	1 Kit
CBR-0050-S	Cobra Board Cuffs - 2 Boxes of Small Cuffs**	1 Kit
CBR-0055-S	Cobra Board Cuffs - 2 Boxes of Large Cuffs**	1 Kit
CBR-0065-S	Cuff Replacement Kit - 1 Box of Small Cuffs, 1 Box of Large Cuffs**	1 Kit

****Cobra Board Cuffs are packaged in boxes of 4 cuffs**

FEMORAL ACCESS PRODUCTS

NEPTUNE

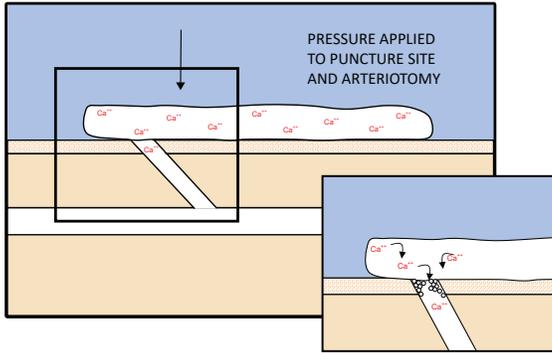

TOPICAL HEMOSTASIS PADS

The TZ Medical Neptune Pad is a natural product derived from sustainably harvested seaweed that utilizes calcium ions to facilitate hemostasis. These ions are activated by the introduction of blood to the Neptune Pad and help to speed up clot formation at the puncture site naturally.

Neptune has no known contraindications and is safe to use on all patients. The texture of the pad eliminates sliding, sliming, and sticking to gloves, and because the entire pad is the active ingredient, there is no "right-side-up."

- Speeds up hemostasis
- Extra-large 2" x 2" surface area
- Naturally derived from seaweed
- Ad-Skin Patch Transparent Film Dressing included
- Latex-free & contains no animal products
- Texture helps prevent sliding or sticking
- Cost-effective

Item Number	Description	UOM
8870-01	Standard 2"x2" Neptune Pad	Box of 10
8870-03	Neptune Plus with Polymar Backing	Box of 10
8870-04	Standard 1"x2" E-Neptune Pad	Box of 10
8870-07	SilverStat - Antimicrobial Pad with Silver	Box of 10

NEPTUNE

Standard 2" x 2" Neptune Pad with an all-natural active ingredient woven into the material.

NEPTUNE PLUS

Premium 2" x 2" Neptune Pad with an added transparent protective polymer backing on one side.

E-NEPTUNE

Standard 1" x 2" Neptune Pad that provides all of the same benefits as the Standard Neptune pad at half the size.

SILVERSTAT

Slim 2" x 2" Neptune Pad with an additional silver nitrate element that adds antimicrobial support to help prevent bacterial infections.

EZ HOLD

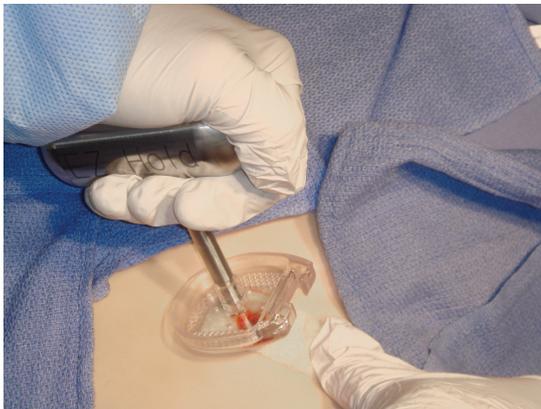

MANUAL COMPRESSION DEVICE

The EZ Hold is a manual-assist compression device developed to aid the clinician in manual femoral pressure.

The device was designed and patented by an RN who sought to reduce hand fatigue and direct contact with bodily fluids. The ergonomic design of the EZ Hold permits the clinician to hold pressure comfortably with one hand while palpating the pulse with the other.

The EZ Hold is best used in conjunction with our line of Standard Discs and Neptune Discs. These come in two styles and have the advantage of having a Neptune pad built into the disc, which speeds up hemostasis and reduces holding times.

- Reduces hand fatigue
- Ergonomic design
- Cuts down on direct contact with bodily fluids
- Can be held comfortably with one hand
- Fits a wide variety of discs
- Neptune Discs speed up hemostasis

Item Number	Description	UOM
8260-20	2 lb. EZ Hold	1 Each

PATIENT POSITIONING PRODUCTS

PANNUS RETENTION SYSTEM - 02

TWO PADS AND ONE STRAP

The TZ Medical Pannus Retention System (PRS) is a versatile hook-and-loop pad and strap solution designed to safely and efficiently manage excess tissue in high BMI patients. Quick and easy to apply, the PRS not only secures tissue but also serves as a reliable patient positioning tool for a range of procedures, including femoral access for heart catheterizations and TAVRs, left arm deflection for radial access, and breast deflection for pacemaker or ICD implants. By combining safety, efficiency, and adaptability, the PRS helps clinicians streamline workflow while maintaining optimal patient positioning, with the safety of the patient's skin integrity as a priority.

- Hypoallergenic, latex & residue-free
- Adhesive pads are designed to reduce damage to the skin
- Ideal for groin access, left-side radial access, & more!
- Completely adjustable system - will fit any sized patient
- Can be applied in less than one minute
- Easy to reposition after application

Item Number	Description	UOM
CZ-PRS-02	Pannus Retention System - Two Pads, One Strap, Non-Sterile	Box of 10

PANNUS RETENTION SYSTEM - 04

FOUR PADS AND TWO STRAPS

The TZ Medical Pannus Retention System (PRS-04) provides a safe and effective method for positioning and retracting excess pannicular tissue during groin access procedures in high BMI patients. Designed for quick application, the PRS-04 can be securely placed in under one minute, allowing clinicians to easily position patients for a wide range of procedural needs.

This system includes four adhesive pads and two adjustable medical-grade hook-and-loop straps, which can be repositioned at any time during use for optimal patient comfort and accessibility. The proprietary, residue-free adhesive minimizes the risk of skin tears and degradation often associated with traditional tape or competing products, ensuring both safety and ease of use in clinical settings.

- Ideal for bilateral access & Trans Aortic Valve Replacements (TAVR)
- Hypoallergenic, latex & residue-free
- Adhesive pads are designed to reduce damage to the skin
- Completely adjustable system - will fit any sized patient
- Can be applied in less than one minute
- Easy to reposition after application
- Sterile & designed for surgical procedures

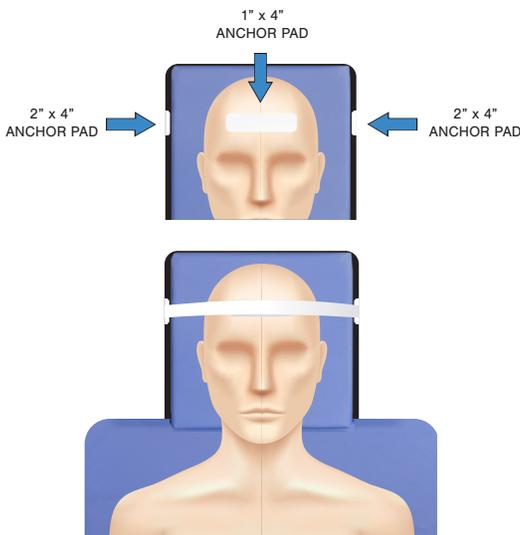

Item Number	Description	UOM
CZ-PRS-04	Pannus Retention System - Four Pads, Two Straps, Sterile	Box of 10

CRANIAL IMMOBILIZATION SYSTEM HEAD STABILIZATION DEVICE

The Cranial Immobilization System (PRS-03) is a safe and effective solution for immobilizing the patient's head during imaging and various other surgical procedures. Designed with micro hook-and-loop technology, this unique system is completely adjustable to ensure optimal support and comfort for your patients.

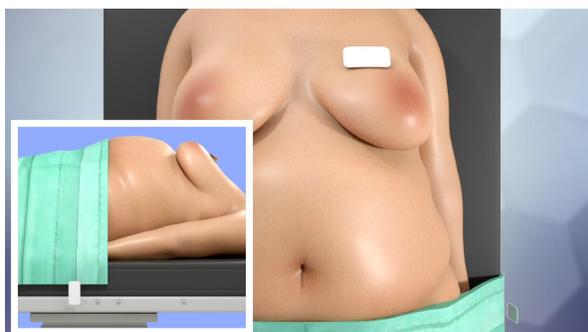

- Immobilizes the patient's head in a safe & effective manner
- Hypo-allergenic, latex-free & residue-free
- Completely adjustable system - easy to apply & reposition if needed
- Prolongs equipment life-span & increase regulatory compliance by avoiding tape & tape residue
- Can be used in various procedures such as Cataract Surgery, Neurointerventional Radiology, MRI/CT scans, & more!

Item Number	Description	UOM
CZ-PRS-03	Cranial Immobilization System	Box of 10

BREAST DEFLECTION ALTERNATIVE APPLICATION

Simple, effective breast deflection for pacemaker and ICD implantation; PRS-03 securely and safely deflects breast tissue away from the implant location, ensuring optimal accessibility. The hypoallergenic adhesive used in the system is gentle on sensitive tissue and can be removed easily from both the patient and the equipment without leaving any sticky residue.

PATIENT POSITIONING PRODUCTS

COMFORT CRADLES

PATIENT ARMBOARDS

The TZ Medical Comfort Cradle is a versatile product that aids both the patient and the operator during procedures. The cradle's extended width improves comfort, making long procedures more tolerable for the patient. It is available in a clear polycarbonate material or a white polypropylene material, both providing durability and comfort. The dimensions of the Comfort Cradle provide superior support during vascular procedures when compared with smaller, less robust arm boards.

- Patient is more accessible to the physician
- Extra wide dimensions for added comfort
- Reduces secondary & scatter radiation when using the Comfort Shield drape
- Options of either durable polycarbonate or polypropylene construction

Compatible with the Comfort Shield

Item Number	Description	UOM
CZ-100	Comfort Cradle Kit	Set of 2
CZ-001	Comfort Cradle Replacement Board	1 Each
CZ-100-PP	Polypropylene Comfort Cradle	Set of 2
CZ-001-PP	Polypropylene Comfort Cradle Replacement Board	1 Each

PATIENT IMMOBILIZER

REUSABLE IMMOBILIZATION DEVICE

The Patient Immobilizer secures the patient during imaging procedures to limit excess movement, thereby eliminating motion artifact. This greatly reduces the need for repeat subtraction runs, which in turn decreases patient and staff radiation exposure. The patient's wrists can be safely attached to the leg wrap using the quick snap and rapid adjustment webbing, which can be quickly undone once the procedure is complete. For additional safety, a second wrap may also be secured around the patient's chest.

- Improves safety for the patient & staff during imaging procedures
- Eliminates motion artifact caused by patient movement
- Cuts down on the need for repeat subtraction runs
- Quick snap & rapid adjustment webbing for fast immobilization of the patient
- Patient may be effectively secured during procedures where conscious sedation is used

Item Number	Description	UOM
CZ-106	Patient Immobilizer - Includes 1 set of CZ-008	1 Kit
CZ-107	GE Patient Immobilizer - Includes 1 set of CZ-008	1 Kit
CZ-008	Disposable Wrist Wraps	1 Each
CZ-012	XXL Extender	1 Each

COMFORT HALO

ANESTHESIA DRAPE POSITIONER

The TZ Medical Comfort Halo is designed to enhance safety and comfort for patients undergoing conscious sedation. The polycarbonate base is compatible with all bed types, allowing it to easily slide underneath the imaging table mattress pad. The steel and vinyl tubing can be manipulated into a multitude of different draping positions, keeping the drape out of the patient's face and allowing complete visualization of the patient at all times.

- Increases patient comfort by keeping anesthesia drape off of patient's face during conscious sedation
- Ideal for all departments using radiographic imaging & sterile technique
- Offers an unobstructed view of patient during procedure
- The flexible design may be molded to the desired shape or height
- Compatible with any bed type, no arm rails necessary

Item Number	Description	UOM
CZ-009	Comfort Halo	1 Each

SIDEWINDER BOARD

ANESTHESIA DRAPE POSITIONER

The TZ Medical Sidewinder Board is a simple solution that improves patient safety and comfort by effectively positioning the anesthesia drape away from the patient's face while undergoing conscious sedation. Designed with a sturdy carbon fiber base and a flexible gooseneck, the Sidewinder Board slides underneath the table mattress on either side of the patient and is easily adjustable during any procedure. The malleable steel and vinyl gooseneck can be molded into unlimited draping positions, enhancing visualization and patient satisfaction.

- Improves patient comfort
- Enhances visualization of the patient during procedures
- Flexible gooseneck can be molded to any desired shape or height
- Carbon fiber base can be positioned on either side of the patient
- Compatible with any bed type, no arm rail necessary

Item Number	Description	UOM
CZ-009-HH	Sidewinder Board	1 Each

INTERVENTIONAL PRODUCTS

ACCUFLATE

INFLATION DEVICE

The TZ Medical AccuFlate is a 20ml disposable device designed to accurately control and monitor pressure during inflation and deflation of dilation balloon catheters. Our patented technology allows the AccuFlate to generate pressure up to 30 atm or 40 atm with accuracy of ± 1 atm.

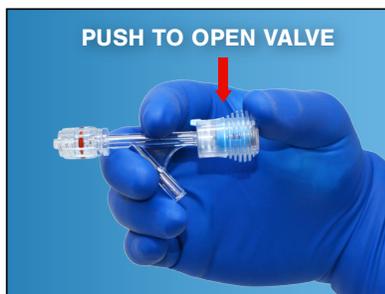

- Precision manometer with 30 atm & 40 atm maximum pressure options
- A patented self-locking mechanism for easy one-handed locking control
- Ergonomic handle with gradual & rapid pressure release
- Optional, male rotating Luer Lock, 3-way stopcock with "ON" or "OFF" tap handle
- PTCA Accessory Kit available

Item Number	Description	UOM
IDD-0001	30 atm Balloon Inflation Device	Box of 5
IDD-0040	40 atm Balloon Inflation Device	Box of 5
IDD-0010	AccuFlate with PTCA Kit	Box of 5
IDD-0020	PTCA Accessory Kit with Tuohy-Borst Valve, Guidewire Insertion Tool, & Torque Device	1 Each

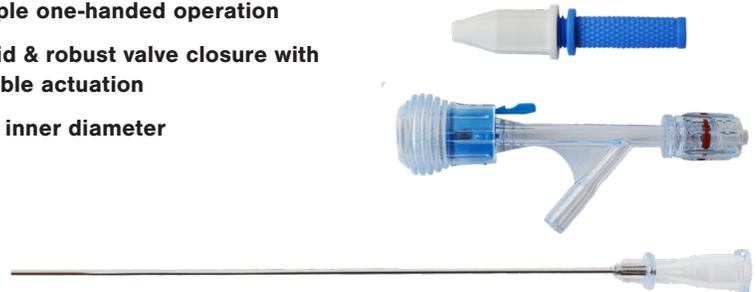

PUSH-CLICK

Y-CONNECTOR KIT

The TZ Medical Push-Click Y Connector is designed to provide rapid, single-handed valve manipulation with a simple push-and-click action. When the mechanism is compressed, the release lever holds the valve in an "open" position, allowing for free movement of wires and catheters. When wire/catheter manipulation is no longer needed, the valve can then be closed by disengaging the release lever. The Push-Click Y Connector Kit includes a Wire Introducer and a Torque Device.

- Simple one-handed operation
- Rapid & robust valve closure with audible actuation
- 7.9F inner diameter

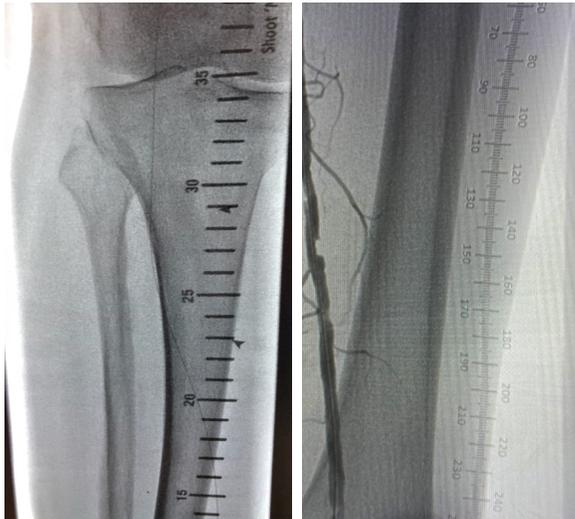

Item Number	Description	UOM
IDD-0030	Push-Click Y Connector Kit with Wire Introducer & Torque Device	Box of 5

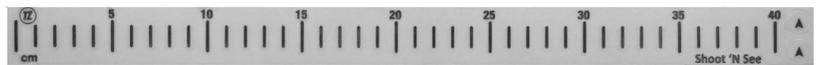

SHOOT 'N SEE

RADIOPAQUE TAPE

The TZ Medical Shoot 'N See is a flexible medical-grade tape for use during any vascular procedure involving radiography or fluoroscopy. Applied to the skin or drape before the procedure, the radiopaque markings are visible both to the naked eye and under fluoroscopy, which allows for quick cross-referencing between the inside and outside of a patient's body.

- Fully visible with or without fluoroscopy
- Arrow indicators to show the precise location of the lesion(s)
- Allows for quick cross-referencing between the inside/outside of the patient's body
- Packaged sterile & measures up to 40 cm or 400 mm
- Great for vascular procedures

Item Number	Description	UOM
RCM-0005-10	Shoot 'N See 40 cm Tape	Box of 10
RCM-0005-30	Shoot 'N See 40 cm Tape	Box of 30

ELECTRODES & GROUNDING PADS

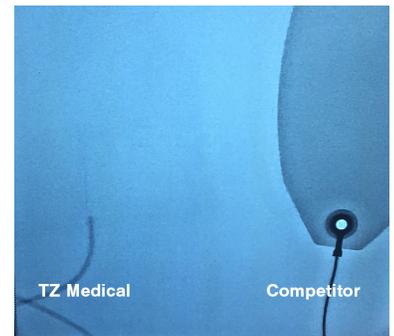

DEFIBRILLATION ELECTRODES

ADULT, PEDIATRIC, AND STERILE ELECTRODES

Our multi-function electrodes are designed for EP and Cath Labs, Cardiac Surgery, Critical-Care Areas and other related departments. They are designed for defibrillation, synchronized cardioversion, external pacing and ECG monitoring. Compatible with biphasic defibrillators, our electrodes offer direct connections to a variety of defibrillators, such as Zoll® and Medtronic® QUIK-COMBO™. We also offer adapters, allowing multiple brands of defibrillators to use the same electrodes.

- Lead wire lengths available in 60" & 120" for maximum convenience & utility
- Hydrogel maintains excellent adhesion to the patient's skin
- Radiotransparent & radiotranslucent options available

- 2 – T1 Anderson models allow for multiple brand of defibrillators to use the same electrodes. (adapter needed)
- 3 – Z1 Zoll Models are comparable to Zoll® multifunction electrodes.

GROUNDING PADS

GROUNDING ELECTRODES

TZ Medical's Grounding Pads are indifferent skin contact electrodes designed for energy return of radiofrequency energy in surgical and electrophysiology procedures. The soft foam structure and sticky hydrogel provide optimal adhesion that comfortably conforms to the patient's body while maintaining a large surface area to focus radiofrequency energy at the application site.

- Utilized for safe return of electrosurgical energy from the patient
- 9.8 foot Lead Wire
- Designed with adhesive hydrogel for secure patient application
- Compatible with most generators on the market
- Comfortable foam structure conforms to the patient's body

Item Number	Description	UOM
P-411-V1	Disposable Grounding Pad Electrodes	Box of 50

For more information on our electrode options or available adapters, please visit tzmedical.com or contact us at info@tzmedical.com.

LAB & HOSPITAL ESSENTIALS

PRO11 HEADSET SYSTEM

WIRELESS COMMUNICATION SYSTEM

The TZ Medical Pro11 Headset System enables teams to talk hands-free in the Cath Lab, EP Lab and adjacent rooms - no raised voices or straining to hear, just clear, calm communication between every member of the team, reducing stress and creating a better working environment. The system has full connectivity with external broadcast and audiovisual streaming facilities, enabling the physician to participate real-time in remote broadcasts and seminars. Using high-quality DECT frequencies, multiple systems can be used in the same premises without interference.

MATTRESS PADS

CATH LAB, ANGIO, & X-RAY MATTRESSES

Designed for shorter procedures or short stay procedural/exam tables.

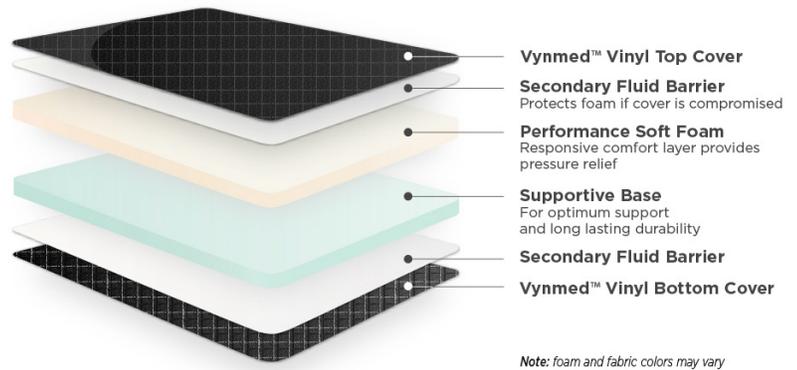

Secondary Fluid Barrier

■ Inserted between the foam and cover, this barrier provides unique protection; if the outer layer is compromised, the foam is protected

Vynmed™ Healthcare Vinyl Cover

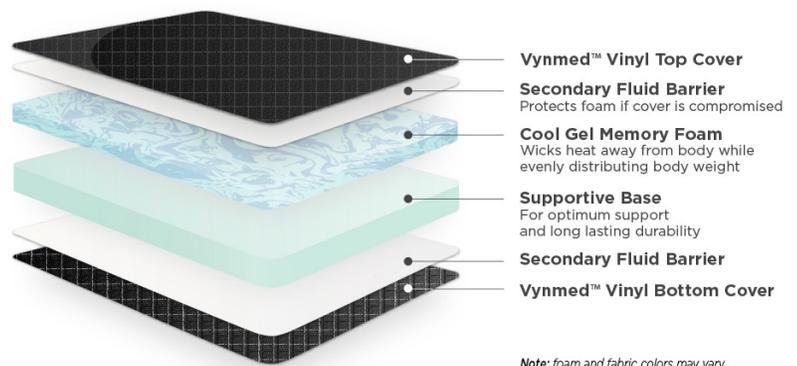

- Anti-bacterial, anti-fungal, water & stain resistant
- Non-allergenic, non-irritating
- Phthalate free, latex free & odor resistant

STANDARD X-RAY/ANGIO PADS

Note: foam and fabric colors may vary

ULTRA COMFORT X-RAY/ANGIO PADS

Note: foam and fabric colors may vary

INDUSTRY-LEADING COMFORT

Our pressure-mapped custom foam layering ensures an optimal level of comfort for every patient.

DURABILITY YOU CAN TRUST

Advanced stability layers provide long-lasting comfort without sagging, ensuring consistent, hard-working performance every time it's used.

EASILY CLEANED REMOVABLE COVERS

Our expertly made covers provide a safe, comfortable, and durable solution for the healthcare industry.

LAB & HOSPITAL ESSENTIALS

STAINLESS STEEL TABLES

INSTRUMENT TABLES

TZ Medical now offers a line of stainless steel instrument tables. Each lightweight stainless steel table has heavy-duty swivel casters, a lower shelf, fully welded legs, and 16-gauge steel. Available in three lengths, TZ tables provide a stable, easy-to-clean surface for all procedures throughout the hospital.

- 16-gauge stainless steel
- Closed hems for simple cleaning
- Convenient lower shelf for storage
- Comes in three lengths: 48", 60", & 72"
- Tables are delivered fully assembled
- Made in the USA

OLD PANELS

NEW PANELS

REPLACEMENT TABLE PANELS

The TZ Medical URPro is a universal system that directly replaces your current MAVIG™ shields with high-quality, long-lasting radiation protection panels. The new URPro Adapter panels are uniquely designed to fit over any MAVIG™ frame system using an adjustable strap that quickly secures around the frame, making placement or removal quick and simple.

- Attenuates 98% of secondary & scatter radiation at 80 kVp
- Lead equivalence of 0.50 mm
- Directly compatible with current MAVIG™ bedside drape framing systems
- Simple installation process
- Fabric binding & structured frame reduce long-term fraying & deterioration

URPRO UPPER SHIELDS

REPLACEMENT UPPER SHIELD PANELS

Enhance your radiation protection setup with TZ Medical's URPro Upper Shield Replacement Panels, engineered for full compatibility with the MAVIG™UT69 framing system. Crafted from high-quality, long-lasting materials, each panel is built to withstand daily clinical use while maintaining exceptional protective performance.

- Attenuates 98% of secondary & scatter radiation at 80 kVp
- Lead equivalence of 0.50 mm
- Directly compatible with current MAVIG™ UT69 shielding systems
- High-quality and long-lasting
- Available in height sizes small (17cm) and large (25cm)

Item Number	Description	UOM
BDR-1053	URPro Upper Shield Panels, Small	4 Panels
BDR-1052	URPro Upper Shield Panels, Large	4 Panels

RADIATION PROTECTION

URPRO OVERHEAD

REPLACEMENT OVERHEAD PANELS

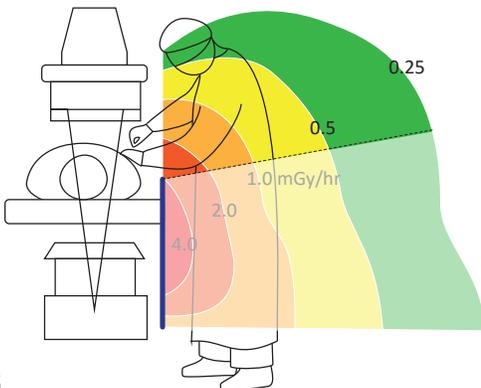

The TZ Medical URPro Overhead is a universal shield that directly replaces your current MAVIG™ overhead shielding with high-quality, long-lasting radiation protection. The URPro Overhead shield is well-structured with fabric binding around the edges, and flexible overlapping strips with a lead equivalency of 0.50 mm.

- Attenuates 98% of secondary & scatter radiation at 80 kVp
- Lead equivalence of 0.50 mm
- Directly compatible with current MAVIG™ overhead shielding systems
- Available in 40 cm and 50 cm widths
- Simple installation process

Item Number	Description	UOM
BDR-1030	40cm Overhead URPro Panel Assembly	1 Each
BDR-1035	50cm Overhead URPro Panel Assembly	1 Each

COMFORT SHIELD

MOBILE RADIATION DRAPE

The Comfort Shield is a leaded shield accessory that supplements the Comfort Cradle arm board. The shield measures 23" x 30", offering a large area of radiation protection to medical staff during procedures involving fluoroscopy.

The Comfort Shield is designed to fit easily over the TZ Medical Comfort Cradle arm board and attenuates nearly 98% of secondary and scatter radiation while remaining unobtrusive to the medical staff. It is easy to sanitize, and comes with a hanger for easy storage.

- Attenuates 97.9% of secondary & scatter radiation at 80 kVp & has 0.5mm lead equivalence
- Low-profile design of Comfort Cradle maintained when shield is in use
- Easy to slip on & off the Comfort Cradle arm board
- Made of durable, flexible material that is easy to sanitize
- Comes with hanger for easy storage

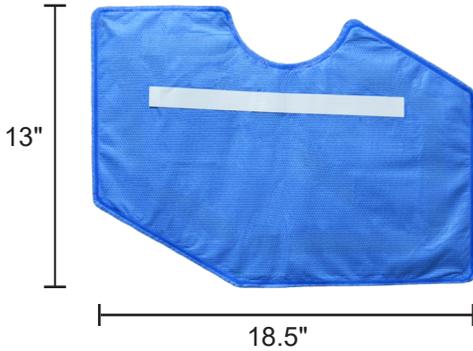

Item Number	Description	UOM
CZ-105	Comfort Shield - Mobile Radiation Drape	1 Each

FLIPPER

RADIATION PROTECTION SHIELD

The Flipper is a versatile radiation shield designed to keep physicians safe without getting in the way of the procedure. The Flipper's 18.5"x13" design allows for use on either the right or left side for femoral groin access or subclavian access. Convenient adhesive strips on either side of the shield allow it to be secured in place to avoid slipping.

Lead-free, and attenuating up to 83% of radiation at 90 kVp, the Flipper is ideal for Interventional Radiology, Cardiac Cath Labs, Electrophysiology and more.

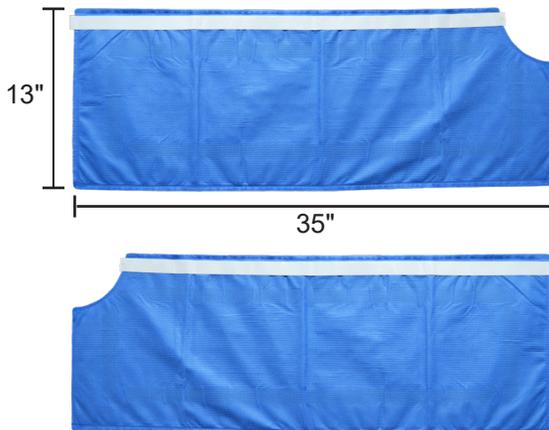

- Attenuates up to 83% of radiation at 90 kVp
- Reduces scatter radiation exposure to operators & staff
- Can be used for femoral groin access or subclavian access
- Adhesive on both sides to prevent slipping
- Lead equivalence 0.125mm
- Perfect for Interventional Radiology, Cardiac Cath, Electrophysiology & more
- Flipper is single-use & sterile

Item Number	Description	UOM
CZ-007	Flipper Radiation Shield	Box of 15

PERIPHERAL FLIPPER

RADIATION PROTECTION SHIELD

The Peripheral Flipper is a versatile radiation shield that adheres to the procedure drape during peripheral procedures for additional protection against scatter radiation. The device is designed with adhesive strips on the front and back, allowing users to place the shield in multiple locations for optimal protection. The Peripheral Flipper attenuates up to 83% of radiation at 90 kVp with a lead equivalence of 0.125mm.

- Lead-free & attenuates up to 83% at 90 kVp
- Adhesive strips on both sides help prevent slipping & allow the shield to be used in multiple locations
- Provides additional radiation protection during peripheral procedures
- Single-use & packaged sterile

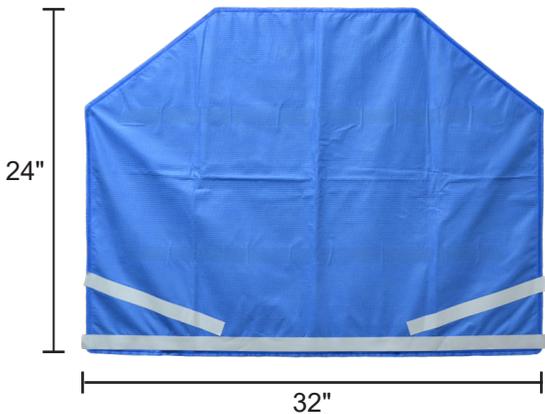

Item Number	Description	UOM
RAD-1030	Peripheral Flipper Radiation Protection Shield	Box of 5

RADIATION PROTECTION

HALO FLIPPER

RADIATION PROTECTION SHIELD

The Halo Flipper is a versatile radiation shield designed to conform and secure to the TZ Medical Comfort Halo to enable increased radiation protection at the head of the procedure table. The Halo Flipper attenuates up to 83% of radiation at 90 kVp with a lead equivalence of 0.125mm. The Halo Flipper is designed with adhesive strips on the back side of the shield and can also be used as an additional radiation protection drape when adhered to the edge of the procedure table.

- Lead-free & attenuates up to 83% at 90 kVp
- Provides additional radiation protection for staff members at the head of the procedure table
- Adhesive strips are designed to adhere securely around the flexible tubing of the Comfort Halo
- Can be used as an additional radiation protection table drape when adhered to the side of the procedure table
- Single-use & packaged sterile

Item Number	Description	UOM
RAD-1020	Halo Flipper Radiation Protection Shield	Box of 5

SR HEADBAND

RADIATION PROTECTION HEADBAND

The TZ Medical SR Headband is a cost-effective way to block scatter radiation from reaching one of the most sensitive areas of the body during diagnostic and interventional procedures. It is disposable, lead-free, easily worn, adjustable to any head size, and attenuates 87% of radiation at 80 kVp.

- Attenuates 87% of scatter radiation at 80 kVp
- Comfortable & lightweight
- Lead-free & disposable
- Fully adjustable, it can be worn over any style of cap
- Cost-effective way to increase safety in the lab

Item Number	Description	UOM
CZ-013	Radiation Protection Headband	Box of 10

ATOMIC

RADIATION PROTECTION EYEWEAR

These wrap-around glasses weigh just 60 grams, and have a lead equivalence of 0.75 mm Pb. The rubberized, anti-slip frames are antimicrobial, and feature vents to prevent fogging. Available in black and gunmetal gray.

NIKE BRAZEN

RADIATION PROTECTION EYEWEAR

The Nike Brazen features high-quality, distortion-free SF-6 Schott glass radiation-reducing lenses with 0.75mm Pb lead equivalency protection. These prescription radiation glasses are available in black and matte black/military blue.

NIKE PREMIER

RADIATION PROTECTION EYEWEAR

The Nike Premier features high-quality, distortion-free SF-6 Schott glass radiation-reducing lenses with 0.75mm Pb lead equivalency protection. These prescription radiation glasses are available in matte black, matte anthracite, and matte tortoise.

OAKLEY TURBINE

RADIATION PROTECTION EYEWEAR

The Oakley Turbine features a wrap-around, lightweight O-Matter frame that is comfortable for all-day use. The radiation-reducing lenses are made from distortion-free SF-6 Schott glass lenses and offer a protection level of .75mm Pb lead equivalency. These prescription Oakley radiation glasses are available in matte black and black ink.

OAKLEY HOLBROOK

RADIATION PROTECTION EYEWEAR

The Oakley Holbrook features high-quality, distortion-free SF-6 Schott glass radiation-reducing lenses with 0.75mm Pb lead equivalency protection. The Oakley Holbrook offers clear CE Certified lenses and weighs 74g. These prescription radiation glasses are available in matte black/red, matte black/silver, and black camo.

WILEY X P-17

RADIATION PROTECTION EYEWEAR

The Wiley X P-17 features high-quality, distortion-free SF-6 Schott glass radiation-reducing lenses with 0.75mm Pb lead equivalency protection. The Wiley X P-17 offers clear CE Certified lenses and weigh 71g. These prescription radiation glasses are available in gloss black, matte black, and brown tortoise.

For a full list of Radiation Protection Eyewear and Rx options, visit www.tzmedical.com

RADIATION PROTECTION

MOBILE BARRIERS

GLASS RADIATION PROTECTION BARRIERS

Our mobile radiation barriers provide solid, leaded X-ray protection with 2.0 mm lead equivalency. Each unit includes large, fully protective leaded glass windows for a clear line of sight, allowing you to work safely without compromising visibility or workflow.

MOBILE SHIELDS

MOBILE RADIATION PROTECTION SHIELDS

Our lead protection shields offer flexible, easy-to-use solutions that help minimize radiation exposure during procedures. Simple in design but highly effective in performance, they allow you to maintain comfort and focus while working.

We also offer **porta shields** for versatile protection in imaging and interventional procedures. These lightweight, height-adjustable shields are easy to maneuver, making them ideal for fast-paced clinical environments where adaptability is key.

PROCEDURE LIGHTING PRODUCTS

STARTROL

PROCEDURE ROOM LIGHTS

StarTrol LED Medical Lights produce a bright white light, (94 CRI and 4700K). They are ideal for true color rendition, and are cool and comfortable to work under, with virtually no radiant heat being generated by the LED's. The lights are energy-efficient, using less than one-third the energy of a halogen light, and require minimal maintenance. StarTrol LED Medical Lights are durable, precision machined in the USA and feature a 10-year warranty. TZ Medical offers a wide variety of light configurations, including ceiling-mounted, wall-mounted, and mobile rolling units, which are sure to fit into any workspace.

- Energy-efficient & eco-friendly
- Bright, natural white light
- 10-year limited warranty
- Cool to work under
- 40,000 hours of LED life
- Infinite variable positioning
- Multi-level dimming

TRUBRITE

ADHESIVE RETRACTOR LIGHT

The TruBrite Adhesive Retractor Light is a sterile, single-use light source that maximizes visualization by directing focused light into surgical cavities, eliminating possible shadowing caused by overhead lighting systems. This low-profile device features a flexible LED light that can be adjusted to any desired position for optimal illumination. TruBrite provides over two (2) hours of continuous light output. The self-adhesive backing enables the TruBrite to be firmly mounted to multiple surgical instruments and surfaces.

- Sterile, compact & disposable design that weighs less than 4 grams
- Provides continuous light for over 2 hours
- Adjustable LED light, providing optimal visibility for any procedure
- Self-adhesive for effortless mounting on multiple surfaces
- Ideal for pacemaker pockets with Army-Navy retractors

CARDIAC MONITORS

TRIDENT® PRO

HOLTER, EXTENDED HOLTER, MCT, AND EVENT

3-Electrode Cable & Charger

3-Electrode Cable with Charging Port & Barrel Jack Charger (Charge-While-Wear)

Trident™ Pro cardiac monitors combine decades of research and innovation to deliver a solution designed to streamline remote ECG recording from start to finish. Built-in telecom and a rechargeable lithium battery deliver the simplicity of a single-piece device with options for remote or local configuration and data transmission.

Records up to 30 days of continuous EKG data

Large LCD color touchscreen with an on-board digital diary

Lithium battery may be charged while in use

Compact and discrete device with water-resistant case

Trident™ Pro monitors are equipped with a large LCD touchscreen and on-board patient diary that provide a user-friendly experience for manually recorded patient events. Three channels of ECG data are acquired from surface electrodes adhered to the body, and 8G of internal memory with an advanced detection algorithm offer a versatile solution to capture, store, and transmit every beat for up to 30 days.

MONITOR	ITEM #	DESCRIPTION
Trident™ 40	H3R-0039	Digital Holter Monitor for Holter and Extended Holter Studies Only

The Trident™ Nano is an accurate, reliable, water-resistant, and fully rechargeable monitor designed to capture clear and comprehensive ECG tracings during Holter and Extended Holter studies. Three channels are recorded from either a long-wear patch electrode or patient cable, and its slim, unobtrusive design optimizes patient comfort and compliance.

- Records 3 channels of ECG from a single patch electrode
- Fast and simple data retrieval via USB connection
- Fully reusable and rechargeable device
- 3-color LED light indicator for device notifications
- Water-resistant for showering

With multiple wear options, 8G of internal storage, and a low-profile design, the Trident™ Nano offers a unique combination of minimal body burden with consistently clear ECG tracings and the superior diagnostic yield of a 3-channel recording for study durations up to 15 days.

***Monitoring Solutions Tailored to Meet the Unique
Needs of Your Practice***

We understand that creating a simple, efficient, and effective ambulatory cardiac monitoring service line means balancing your organization’s human and technological resources. Whether your facility would like to offer In-House reporting for Holter, Extended Holter, Event, and Mobile Cardiac Telemetry monitoring, or partnering with a Service Vendor best suits your needs, we provide a broad array of devices, software, and monitoring services designed to meet your organization’s clinical, workflow, and financial goals.

At TZ Medical Monitoring Solutions, Customer Service is at the core of everything we do. Our goals for our clients are simple: improve clinical outcomes, create new efficiencies, and optimize practice revenues. Why choose TZ? Because we care! Powerful partnerships. Solutions through service.

IN-HOUSE MONITORING SOLUTIONS

For practices that would like to monitor patients internally, we offer an end-to-end solution for all ambulatory cardiac monitoring studies. From monitoring devices to clinical software, TZ Medical is a one-stop-shop for every facet of an internally managed Holter, Extended Holter, Event, and Mobile Cardiac Telemetry service line.

MONITORING SERVICES

Our monitoring services platform is designed to meet the needs of groups who would like to spend less time processing data and more time treating their patients. Multiple device types, workflows, and financial models coupled with industry-leading customer service and report turnaround times allow us to provide timely, accurate, and reliable reports for your providers while forming meaningful relationships with your care team.

TZ Medical Monitoring Solutions is a privately held company based in Portland, Oregon, founded on one simple question. How can we help? We manufacture multiple cardiac monitoring devices and clinical software, and our dedicated team of Customer Success Representatives, coupled with our nationwide direct Sales Representative coverage, create a customer experience that is second to none.

MONITORING PATIENTS INTERNALLY

We offer complete analysis systems for groups who would like to upgrade their device technology and clinical software to monitor patients and generate reports in-house.

PARTNER WITH TZ MEDICAL

Our monitoring services center around building strong and lasting partnerships. Your goals are our goals, your patients are our patients, and our certified cardiac technicians are here to help provide the data you need to offer outstanding care and an exceptional patient experience!
